

Large 11" Desktop Basket in Marigold

Using textile waste, **Camp Copeland Studio** developed art products that offer aesthetic and functional enhancements for office environments. Made from Merino wool felt remnants, **The Color Block: Acoustic Panels** showcases Camp Copeland's core design sensibilities and interest in adding acoustical value and function to their products. The panels can be hung individually and in larger arrangements for visual impact, storage, and to help dampen sounds from surrounding spaces.

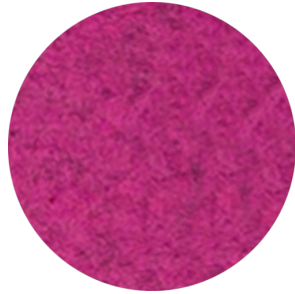

The based Three-Color Block Panel is available in a mix of color options of the client's choosing. A cut Circles Overlay may be added for design interest. Alternatively, Large and Small Storage Pockets may be added for function. **Desktop Baskets in 7", 9", and 11" Diameters** are also available for complimentary office storage.

Felt colors can be mixed and matched for the base panels, overlays, and storage additions.

FELT COLOR OPTIONS

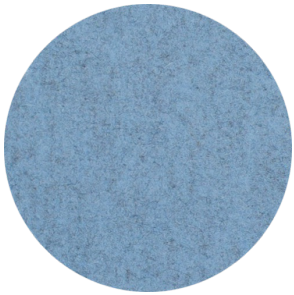

Red

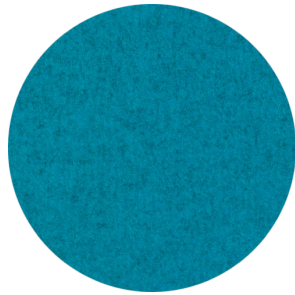

Magenta

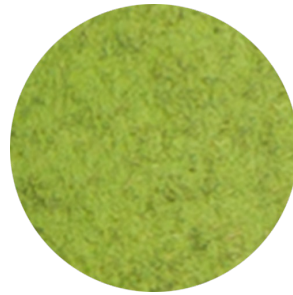

Marigold

Charcoal

**ABOUT THE PRODUCER**

Alyssa and Drew Kail founded **Camp Copeland Studio** in 2015 to improve everyday lives through considered design and intentional living. Inspired by Japanese minimalism, Scandinavian design, and the Swedish concept of “lagom” (meaning “just enough”), Camp Copeland’s core products include mindful home goods and décor made from glass and wool. Made from Merino wool felt remnants, **The Color Block: Acoustic Panels** showcases Camp Copeland’s core design sensibilities and interest in adding acoustical value and function to their products.

SUSTAINABILITY INFORMATION

Meets sustainably **Monmade** Dimensions

- 50% woman-owned creative business located in Braddock, PA, a low-income area.
- Camp Copeland is committed to handcrafted, small-batch production runs for products made of glass and various textiles, including sustainable wool and reclaimed textile scraps.
- The Color Block panel collection uses responsibly-harvested Merino wool, typically from Filzfelt’s end-rolls and cut-offs, helping minimize manufacturing waste.
- Wool is a rapidly renewable resource and is 100% biodegradable. It is durable, has excellent dyeability, and offers sound insulation.
- Improving the aesthetics and acoustics in office design can help increase well-being and mindfulness of occupants.
- Panels are assembled using plated steel bolts, aluminum grommets, and otherwise dry connections (i.e., no adhesives).
