

Temper and Grit introduces a standardized contemporary series of wall cabinets, **Woven**, sustainably made from bamboo plywood, and manufactured by regional partner **Eisenwood**. The pattern is inspired by the effect of traditional caning processes, abstracted, and CNC cut from the board using an algorithm for efficiency. Cabinets in the series are finished with a durable plant-based, non-polluting, zero-VOC finish.

Woven is a series of scalable cabinets, including **Console (shown here)** that offer storage and display solutions for a variety of spaces, like kitchens and offices. Maximizing material yield from a 4'x8' bamboo plywood sheet, the cabinet may be scaled smaller and in different dimensions to fit a variety of spaces while still responsibly utilizing a single sheet of sustainable material. Alternative plywood types are available upon request.

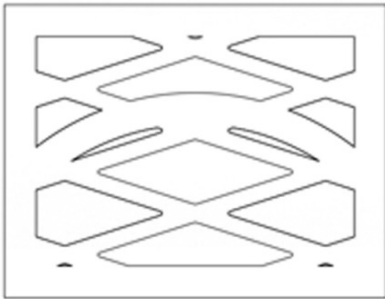

The cabinet mounts using an integrated French Cleat.

SCALED WOVEN CONSOLE CABINET MEASUREMENTS

Full-Size Console Cabinet: 47.5"W x 17.75"H x 13.125"D

Half-Size Console Cabinet: 23.75"W x 17.75"H x 13.125"D

Quarter-Size Console Cabinet: 11.875"W x 17.75"H x 13.125"D

**ABOUT THE PRODUCER**

Temper and Grit is a multimodal design and fabrication studio creating custom solutions for the built environment. Established by Nicholas "Nick" Volpe, Temper and Grit's talent for designing, prototyping, and finishing has led to a diversified portfolio with work in the graphic, architectural, industrial, and artistic fields. Nick offers a unique blend of standard product lines, design solutions, consultations, and custom-fabricated installations.

SUSTAINABILITY INFORMATION

Meets sustainably **Monmade** Dimensions

- Temper and Grit designs for modularity, flexibility, and efficiency for products; producer considers the yields of the materials and the efficiencies of design and fabrication.
- Woven Cabinet is made standard from **Plyboo**—an architectural-grade bamboo plywood with FSC certification and LEED credits available; bamboo is a rapidly renewable material.
- Products are finished water-based paints, sealants, and varnishes; typically, **Rubio Monocoat**, which are durable plant-based, non-polluting 0% VOC wood finishes.
- Temper and Grit's **Green Leap** product supports the local economy by keeping the costs spent on materials, labor, hardware, manufacturing, studio time, and delivery all within 100 miles of Pittsburgh, PA. • Producer is partnering with **Eisenwood**, a Penn Hills (within 13 miles of Downtown Pittsburgh) production shop, to manufacture Woven: Cabinet Series.

MADE IN THE U.S.A.

- Designed by Temper and Grit
- Manufactured by Eisenwood in Penn Hills, PA

FEATURES & BENEFITS

- Series of scalable console cabinets that offer storage and display solutions for a variety of spaces, like kitchens and offices
- Cabinet may be scaled smaller and in different dimensions to fit a variety of spaces while still responsibly utilizing a single sheet of sustainable plywood
- Cabinet lengths may be paired to make a longer console
- Back of the cabinet includes an integrated French Cleat for ease of and a near-seamless wall mounting
- Lead time: approx. 8-10 weeks

TECHNICAL INFORMATION

- Full-Size : 47.5"W x 17.75"H x 13.125"D
- Half-Size: 23.75"W x 17.75"H x 13.125"D
- Quarter-Size: 11.875" x 17.75"H x 13.125"D

FINISH OPTIONS

- Choose Console Cabinet Size(s): Full-Size, Half-Size, Quarter-Size
- Alternative plywood types are available upon request

CARE & MAINTENANCE

- Dust with soft cloth and clean with water-based cleaner as needed
- Installer selects hardware best suited for mounting to the wall; integrated French Cleat provided by cabinet design
