ECO:Homewood Bike Rack. Site furniture can be customized with brand imagery.

ECO:Homewood Site Furniture feature unique community-driven designs. Selected through a community-led process, Ramone Patterson of **KMJ Metalworks** skillfully blended **The Homewood Experience** brand elements with site furnishings manufactured by **Technique AP**—a fabricator of architectural metal products and signage based in Wilkinsburg, PA.

This durable outdoor ground bike rack is available standard for projects in Pittsburgh's Homewood neighborhood or is available customized to suit specific site and community requirements.

ECO:Homewood Bike Rack and Trash Can.

ABOUT THE PRODUCER

Founded in 2011 by Ramone Patterson, **KMJ Metalworks** specializes in decorative metal products for commercial and residential spaces. Embracing pattern, symmetry, and shadow, Ramone creates distinctive art and architectural accents. His hand sketches and digital drawings come to life through CNC fabrication and bold powder-coated finishing. KMJ's signature products now include the **ECO:Homewood Bike Rack and Trashcan,** customizable for site and community requirements.

SUSTAINABILITY INFORMATION

Compliance with LEED V4 credits:

Materials & Resources: Sourcing of Raw Materials

Materials & Resources: Material Ingredients

Regional Priority: Narrative by LEED AP

Meets sustainably**Monmade** Dimensions

- Black-owned creative business designing in Penn Hills, PA manufacturing in western Pennsylvania, including Wilkinsburg, PA.
- Producer's primary production partners are within 50 miles of his studio; Technique AP sources raw materials from suppliers within a 100-mile radius.
- Product fabricated using primarily recycled steel.
- By using cold processes (bolts, rivets, or fasteners) and minimal welding for production of the ECO:Homewood Bike Rack, manufacturer helps reduce materials or other manufacturing processes harmful to human health and the environment.
- Products finished with durable low-to-no-VOC powder coated finishes.
