

ECO:Homewood Bench. Site furniture can be customized with brand imagery.

ECO:Homewood Site Furniture feature unique community-driven designs. Selected through a community-led process, Reggie Raye of **TOMO** skillfully blended **The Homewood Experience** brand elements with site furnishings manufactured by **Technique AP**—a fabricator of architectural metal products and signage based in Wilksburg, PA.

This durable outdoor bench is available standard for projects in Pittsburgh's Homewood neighborhood or is available customized to suit specific site and community requirements.

ECO:Homewood Bench details.

ABOUT THE PRODUCER

Established in 2020 by designer Reggie Raye, **TOMO** focuses on the design and manufacture of museum-quality, made-to-order products. Reggie, a Homewood-based industrial designer and educator, has mastered various fabrication techniques like CNC, casting, welding, and 3D printing. His creations spark joy through the thoughtful use of color, material, shape, and keen observation. The **ECO:Homewood Bench and Planter** is a shining example of TOMO's delightful and engaging products.

SUSTAINABILITY INFORMATION

Compliance with LEED V4 credits:

- Materials & Resources: Sourcing of Raw Materials
- Materials & Resources: Material Ingredients
- Regional Priority: Narrative by LEED AP

Meets sustainably **Monmade** Dimensions

- Creative business designing in Homewood manufacturing in western Pennsylvania, including Wilkinsburg, PA.
- Producer's primary production partners are within 50 miles of his studio; Technique AP sources raw materials from suppliers within a 100-mile radius.
- Product fabricated using primarily recycled steel and aluminum.
- By using cold processes (bolts, rivets, or fasteners) and minimal welding for production of the ECO:Homewood Bench, manufacturer helps reduce materials or other manufacturing processes harmful to human health and the environment.
- Products finished with durable low-to-no-VOC powder coated finishes.
