Nine Forms Print Series, Recollect

The **Recollect** colorway brings warmth and subtle contrast to **Ignacio Lopez's Nine Forms Wood Print Series.** Evoking the gentle tones of vintage textiles and aged natural materials, this palette combines soft corals, earthy greens, golden neutrals, and muted mauves to create a quietly expressive and balanced visual language.

Printed on 3/8" **responsibly sourced Baltic birch,** each 11.5" x 11.5" panel showcases one of nine modular designs. Panels can be displayed individually or in combinations—grouped within the **Recollect** palette or **mixed across colorways,** including Bauhaus and Morning Garden, for custom arrangements.

Versatile, impactful, and **made for dynamic configurations,** Nine Forms suits residential, commercial, or hospitality spaces that embrace bold design and intentional composition.

HOW TO USE

Nine Forms Print Collection is designed for flexible composition—ideal for personalized installations in residential, commercial, or hospitality interiors. Each 11.5" x 11.5" panel can be displayed on its own, repeated in multiples, or grouped with other designs and colorways for a customized layout.

Use one design across all three colorways to explore variation within form, as shown with **Design 1 in Bauhaus, Morning Garden, and Recollect**. Or, build a graphic and asymmetric arrangement using a curated mix of **Recollect colorway designs** for bold, high-contrast impact.

Z-clips on the reverse of each panel allow for easy, secure mounting and consistent spacing, whether arranging a grid, row, or staggered layout.

ABOUT THE PRODUCER

Ignacio Lopez draws from alchemical illustrations and the Japanese concept of Ma—the pause between forms—to explore shape, rhythm, and balance. Through **Green Leap**, he expands his studio, Alchemic Print, with Nine Forms, a modular series of bold geometric prints. Each of the nine designs is available in three color palettes and printed on 11.5" x 11.5" wood panels, designed for versatile display in residential or commercial settings. Panels can be arranged within a single palette or mixed across colorways to suit any composition.
