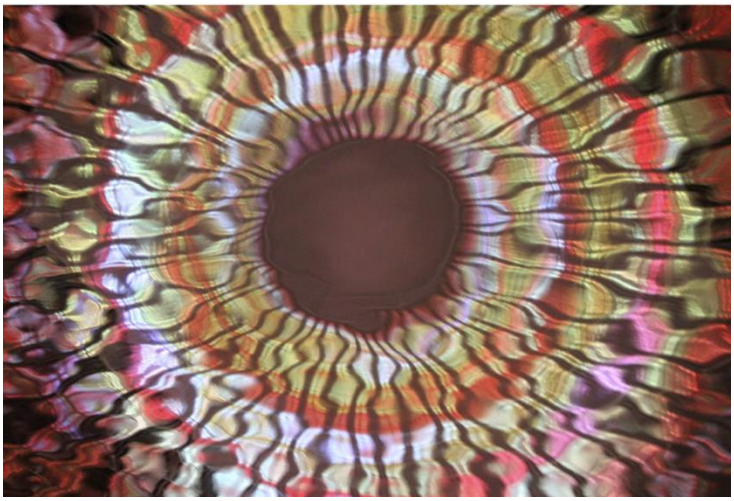
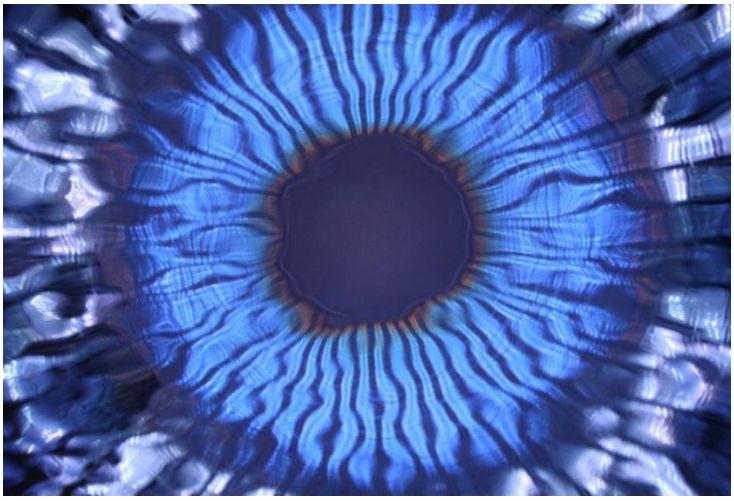
Scaled Perspectives Designer Series



Scaled Perspectives Designer Series, **Oculus Abstracted, Red**



Scaled Perspectives Designer Series, **Oculus Abstracted, Dark**

Part of the **Scaled Perspectives Designer Series,** this dynamic photographic work by Glenn Olcerst offers an immersive visual solution for interior environments through rhythm, movement, and bold color**.** Printed on lightweight, recyclable aluminum panels, each composition can be tiled or arranged in custom groupings for impactful wall installations in hospitality, workplace, and wellness settings.

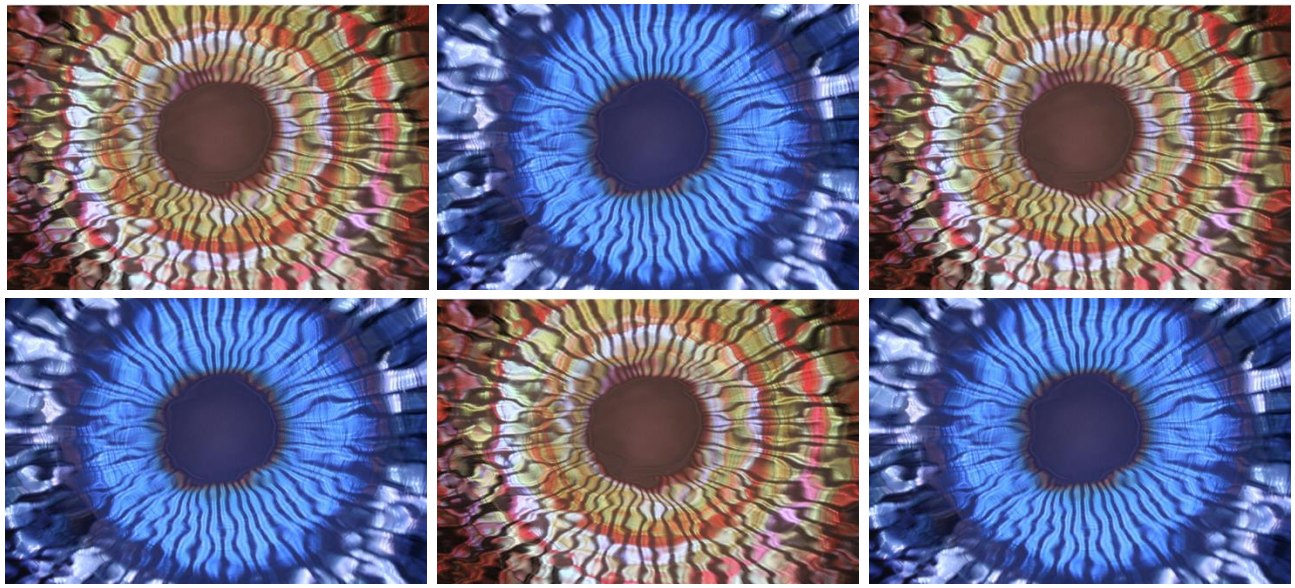
Oculus Abstracted is available in two tonal options—**Red** and **Blue**—which may be used independently or tiled together to create dynamic, flowing arrangements.

Available in satin, semi-gloss, and clear base finishes in sizes up to 48"x96". Custom layouts and commissions available upon request.

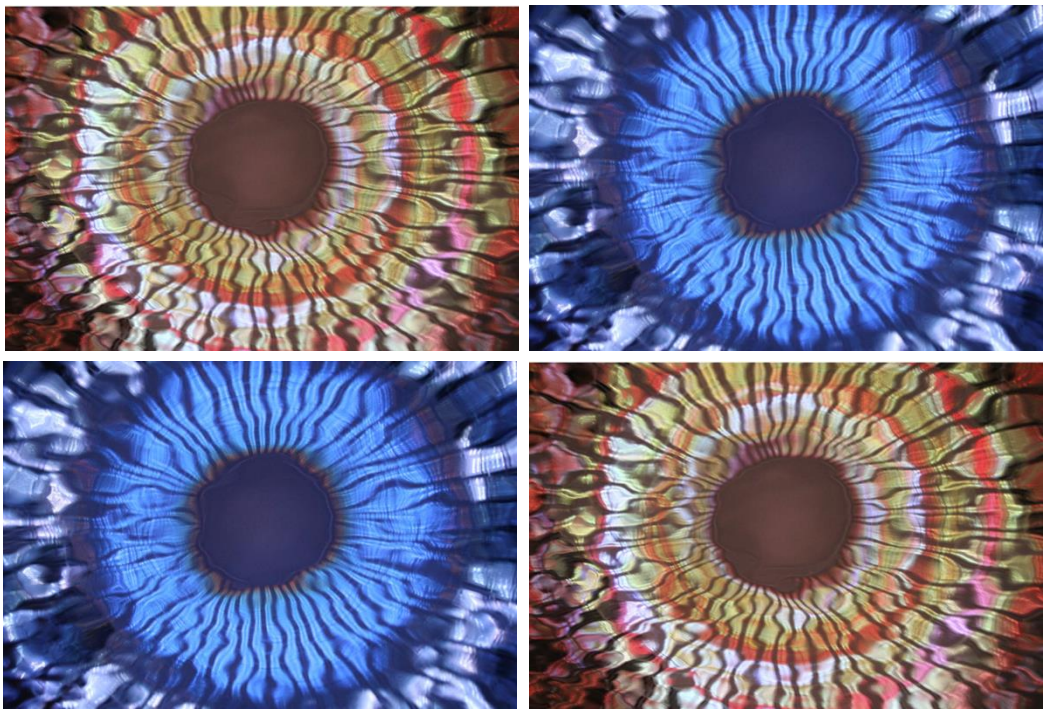
HOW TO APPLY THE COMPOSITIONS IN YOUR PROJECT

The mock-up below shows **Oculus Abstracted** tiled in different grids and pairs—demonstrating a few examples of how individual panels can be arranged to create expansive, visually rhythmic installations. Each composition in the series is designed to scale fluidly within a range of environments and layout needs.

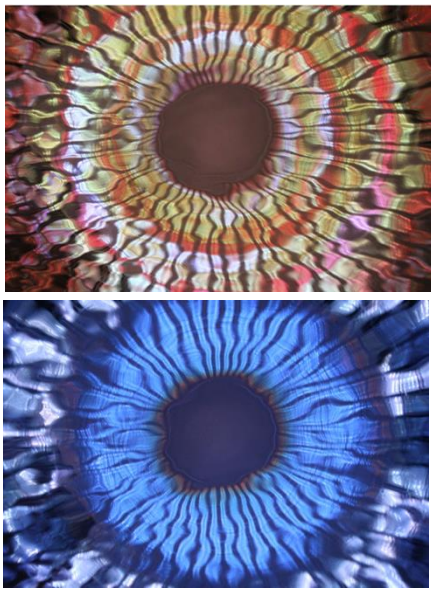
- Available in two tonal variations—**Red** and **Blue**—which may be used independently or mixed to enhance contrast and flow.
- Panels can be **tiled horizontally** to suit walls of various sizes and proportions.
- Ideal for lobby features, wellness environments, office corridors, or anywhere artwork needs to anchor a space with bold visual movement.



Scaled Perspectives Designer Series, **Oculus Abstracted, Red and Blue tiled grid.** Largest possible dimension of each panel is 96"Wx48"H.

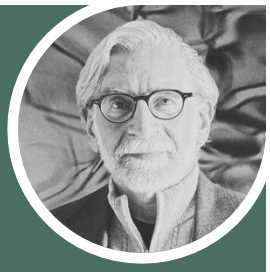


Scaled Perspectives Designer Series, **Oculus Abstracted, Red and Blue tiled grid.**
Largest possible dimension of each panel is 48"Wx48"H.



Scaled Perspectives Designer Series, **Oculus Abstracted, Red and Blue tiled vertically.** Largest possible dimension of each panel is 48"Wx48"H.

Scaled Perspectives Designer Series, **Oculus Abstracted, Red and Blue tiled horizontally.** Largest possible dimension of each panel is 48"Wx48"H.



ABOUT THE PRODUCER

Glenn Olcerst transforms destination photography into immersive visual experiences for interior environments. His fine art imagery captures the textures, forms, and rhythms of natural and built spaces—from organic abstractions to architectural studies—offering designers scalable compositions with narrative depth. Developed through Green Leap, his **Scaled Perspectives Designer Series** features lightweight aluminum panels that can be tiled or grouped for striking feature wall installations. With an eye for balance and place, Glenn invites designers to reimagine space through curated visual storytelling and site-responsive design.

SUSTAINABILITY INFORMATION

Meets sustainably**Monmade** Dimensions

- Artwork is printed **on lightweight, recyclable aluminum,** offering a durable and lower-impact alternative to traditional large-scale art substrates.
- **Designer-directed applications,** including feature walls and custom installations, support sustainable interiors through material efficiency and reduced resource use.
- **Nature-inspired imagery** enhances the built environment, encouraging calm, connection, and visual wellness in hospitality, workplace, and wellness settings.
- **Glenn Olcerst is a regional artist and small business owner** who prioritizes long-lasting, adaptable art solutions that reduce waste and support mindful sourcing.

MADE IN THE U.S.A

- Artwork made in Pittsburgh, PA
- On-demand fabrication in North Carolina

FEATURES & BENEFITS

- Scalable photographic compositions available in multiple subject types, including Oculus Abstracted in Red and Blue
- Designed for adaptable use in interior and exterior environments, including feature walls and grouped installations
- Lightweight, durable aluminum panels reduce material waste and simplify install
- Lead time: 3–5 weeks

TECHNICAL INFORMATION

- Clients collaborate with the artist to select final configuration, scale, and finish
- Suggested applications: wall-mounted panels, grouped (tiled) installations
- Sizing: Full range of custom dims available up to individual panel size 48"x96" (4'x8')
- Standard float mounted shadow box; other frame and frameless options available

FINISH OPTIONS

- Standard finish semi-gloss, which includes a thick acrylic coat that bounces light in a way that look luminous
- Custom finishes and arrangements available upon request

CARE & MAINTENANCE

- Follow fabricator guidelines
- UV-protective coatings are recommended for longevity in direct sunlight
